- ◆ Nursing Stations
- ◆ Patient Registration Areas
- ◆ Laboratory & X-ray
- ◆ Labor & Delivery
- ◆ Same Day Surgery
- ◆ Emergency
- ◆ Ambulatory Surgery
- ◆ Clinics
- ◆ Outpatient Services

The **Patient ID XPress**TM system provides you with the ability to print patient identification labels or wristbands *instantly* anywhere in your facility. Our ‘On-Demand’ label system allows end-users to print labels or wristbands *when*, and most importantly, *where* you need them.

Patient ID XPressTM is a customizable printing system that produces clear, legible patient labels and wristbands. **Patient ID XPress**TM produces labels and wristbands with barcodes for identification and tracking. It replaces or enhances the functionality of your embossed patient card system or laser sheet printing system.

Our unique and patent pending use of **PDF417** barcode technology uses your existing patient information data stream to print a single patient “Master” label that is then used to produce labels and wristbands anywhere they are needed. This system operates off-line and is independent of your mainframe systems.

If you are wasting money by having to produce an expensive sheet of labels every time you run out, or are looking for an alternative to illegible document heading imprints from your embossed plastic card system, you need to see the **Patient ID XPress**TM system.

Wristband Station

The Patient ID *XPress*™ Wristband Station features a small footprint along with a price tag that won't be a budget buster. This system provides the perfect fit for all your wristband production requirements, all in a package size that suits even the most crowded workspaces.

Portable Label Station

Portable label creation is now a reality. If you need temporary labels on the go, the *XPress*™ Portable System provides the perfect solution. This small form factor system with a rechargeable battery can create labels anywhere, even at the patient's bedside.

Color Label / Wristband Station

The Patient ID *XPress*™ System now gives you the flexibility to print color wristbands and labels. The addition of this technology to Patient ID *XPress*™ product line allows full color photographs, images, and multiple alerts to be printed on a single wristband, alleviating the need for multiple wristbands per patient. Areas such as the pharmacy and lab departments can also benefit by avoiding the need to inventory cumbersome and expensive preprinted labels.

High Demand Label / Wristband Station

Looking for a high volume printing system at an affordable price? The 2410M Patient ID *XPress*™ label and wristband printer offers a print speed of 10-12 inches per second. It is also Plug and Play with the most popular systems on the market.

Downtime Keyboard

The Downtime Keyboard along with any of the Patient ID *XPress*™ printers provides the ideal downtime solution.
